## Tactile Handrail Indicators

- For use on handrails as an indicator for the sight impaired that gives warning of the beginning and end of a handrail
- Also used along the top of a handrail as a skateboard deterrent
- 
- To install, drill a 6mm hole in the desired position on top of the rail and tap the button in with a soft faced hammer
- 
- The interference fit ensures a permanent fix
- 
- Available in 316 satin and polished finish
